

The many advantages of dental implants

1

Improve your confidence – If you are ever worried that your denture will move or slip, then the fixed security and life-like appearance of dental implants will help.

2

Enjoy your favourite foods – Because dental implants are fixed you can eat what you like, and because there is no palate you can taste things again, and appreciate hot foods, or that cold beer!

3

Natural, life-like appearance – Dental implants offer a beautiful natural appearance and can match your other existing natural teeth or can be used to improve your appearance and smile.

4

Better for your oral health – Unlike bridges, dental implants do not damage adjacent natural teeth.

5

Long lasting solution – Provided they are carefully cleaned and looked after, dental implants will usually last longer than crowns, bridges or dentures. If you maintain them well and your mouth stays healthy, then they will last many years.

6

Preserve healthy bone – When your natural tooth is removed, the bone within the jaw that supported it dissolves away. Placing a dental implant to replace the tooth helps to conserve that bone and avoids the appearance of a shrunken jaw.

7

No more taking your teeth out at night – Because dental implants provide a fixed tooth replacement, there is no need to remove them at night time.

8

Substitute for a natural tooth root – Made from titanium, dental implants can be used to replace individual teeth, larger gaps or even all the teeth in a jaw. They are also used to stabilise a removable denture.

9

Precision placement – We use a 3D x-ray /Cone Beam CT Scan to accurately and safely place the dental implant. Using cone beam technology takes the guess work out of implant surgery. We know exactly where to place the implant and if there is sufficient bone beforehand.

10

Love your smile again – Dental implants are as close as it is possible to get to a natural tooth, both in function and in appearance.

“Excellent.
Dr Aziz put
me at ease
and was very
professional
throughout.
Would thoroughly
recommend.”

Be confident of implant treatment at Benhill Dental

“ Dr Aziz is a fantastic implant dentist. I was so anxious about the procedure but he made me relax by playing my favourite music. First class - if you are worried about implants, please don't be, it doesn't hurt and Dr Aziz is very gentle. It is so worth it overall, I am delighted. Thank you Dr Aziz for giving me my smile back. ”

Dr Salam Aziz is a restorative dentist with a distinguished background and a special interest in implant dentistry. His clinical expertise encompasses the management of complex dental cases, including tooth wear, fixed and removable restorations, bite issues, aesthetic dentistry and implant placement and restoration.

Salam insists on using the very best materials, which is why at Benhill Dental Practice, we only place Straumann and Osstem implants. These trusted global brands have been around for over 30 years, ensuring optimal, reliable results.

His expertise spans a wide range of implants, from routine to advanced cases, including immediate implantation, where replacement teeth are placed on the same day, and full-arch restorations.

Our practice is one of the most technologically advanced in the area, utilising 3D CT scanning for precise implant placement and modern alternatives to traditional impressions. We also employ blood growth factors to enhance healing. An implant consultation with Salam is £40 and treatment starts from £299.

In addition, our service extends to ongoing care, with our trained hygienist providing dedicated implant aftercare and annual reviews to ensure long-term success.

If you're unsure whether implants are the right solution for you, Salam will take the time to sit down with you and discuss your options, ensuring you receive the best possible treatment plan tailored to your needs.

Still unsure? Visit our implant dentist who will be happy to answer any of your questions.

Dr Salam Aziz

**BDS, BSc Hons. Senior associate
and implant dentist
GDC No. 259317**

Salam qualified from Bart's and the Royal London School of Medicine and Dentistry in 2015 and also has a Bachelor Degree in Biomedical Science which he completed in 2011.

Known for his friendly and caring approach, Salam has gained a reputation as an approachable dentist who always takes the time to listen to his patients' concerns.

He has pursued extensive postgraduate training in porcelain restorations and implants and is committed to staying at the forefront of his field by continually advancing his knowledge through the latest implant courses. Beyond his clinical practice, he is also deeply involved in dental education, teaching and mentoring early-career dentists.
